PROFESSIONAL SUMMARY

Results-driven IT Systems Engineer and IT Operations professional with 11+ years of experience supporting enterprise infrastructure, Microsoft 365 environments, Windows Server, Active Directory, Azure AD (Entra ID), networking, and cloud technologies. Experienced in managing hybrid on-premises and cloud environments, delivering 2nd and 3rd line support, troubleshooting complex infrastructure issues, performing root cause analysis, and maintaining secure, highly available systems. Skilled in Microsoft 365 administration, endpoint management, vulnerability remediation, patch management, vendor coordination, and IT service delivery within fast-paced enterprise environments.

CORE TECHNICAL SKILLS

- **Systems Administration:** Windows Server, Linux, system monitoring, configuration, troubleshooting, maintenance, and performance optimisation.
- **Microsoft Infrastructure & M365:** Active Directory, Microsoft Entra ID (Azure AD), Group Policy (GPO), SCCM/MECM, Intune, IAM, endpoint management, Exchange Online, SharePoint, Teams, OneDrive, Defender, Autopilot, MFA, Conditional Access, licensing, and user lifecycle management.
- **Cloud & Virtualisation :** AWS, Microsoft Azure, GCP, VMware vSphere/ESXi, Hyper-V, KVM, cloud migration, infrastructure optimisation, capacity planning, and virtual machine management.
- **Networking:** TCP/IP, LAN/WAN, VLANs, VPN, DNS, DHCP, firewalls, wireless networking, Cisco/Meraki, and network troubleshooting.
- **Security & Compliance:** Endpoint security, patch and vulnerability management, system hardening, access control, MFA, security controls, and incident response.
- **IT Service Management:** Incident and escalation management, change management, root cause analysis, SLA management, and IT service delivery using ServiceNow, Salesforce ITSM, and Jira.
- **Automation & Scripting:** PowerShell, Python, Bash, Terraform, Ansible, and Puppet.
- **Storage :** SAN / Block Storage (Fibre Channel (FC), Iscsi) , NAS/ File Storage (NFS, SMB) , Local Block Storage(DAS, RAID)
- **Cloud Object Storage :** Azure Blob Storage, Amazon S3, Wasabi, Backblaze B2, Lyve Cloud
- **Cloud File / Block Storage:** Cloud object, file, and block storage
- **Backup & Recovery:** Veeam Backup & Recovery, Linux Hardened Repository, deduplication, disaster recovery

CAREER HISTORY

IT Systems Administrator | Intel Corporation - Dublin

2021 – Present

Responsibilities

1. User Support & Troubleshooting

- Provided advanced third-line technical support through Salesforce ITSM, resolving complex incidents and high-priority requests in accordance with ITIL standards.
- Led major incident responses for production outages, restored services quickly, performed root cause analysis, and implemented preventive measures.
- Diagnosed and resolved issues across hardware, operating systems, virtual machines, applications, and network infrastructure to minimize business disruption.
- Respond to alerts regarding outages, slowdowns, resource spikes, and performance degradation to ensure timely resolution and minimize business impact.
- Created clear, detailed troubleshooting guides and knowledge base articles that increased operational efficiency and enhanced team capability. These resources also reduced recurring incidents in core systems and infrastructure.

2. Systems Administration

- Monitor system health dashboards for servers, networks, databases, and cloud resources to ensure uptime, performance, and capacity.
- Administer Microsoft 365 services, including Exchange Online, Intune, SharePoint, Teams, OneDrive, and Autopilot.
- Manage user accounts, permissions, multi-factor authentication, single sign-on, and identity services across Active Directory and Entra ID.
- Maintain file shares, Group Policy Objects, backups, and disaster recovery readiness.
- Automate routine tasks using PowerShell, Bash, and Python.
- Execute comprehensive patch management across servers, endpoints, and network devices. Apply timely updates to operating systems, virtualization platforms, and cloud services to reduce vulnerabilities and maintain a stable, compliant, and resilient security posture.
- Conduct vulnerability monitoring, remediation, and reporting to fulfill organizational and regulatory requirements.
- Support infrastructure audits and collaborate with security teams to strengthen controls, identify risks, and prevent unauthorized access or breaches.
- Contribute to breach prevention by conducting proactive analysis, enforcing policies, and continuously improving security practices.
- Diagnose Dell PowerEdge hardware using iDRAC, Lifecycle Controller, and SupportAssist tools.
- Configure, maintain, and troubleshoot enterprise routers, switches, firewalls, and wireless access points to ensure secure and reliable network operations.
- Administer IP addressing, VLANs, routing protocols, DNS, and DHCP. Implement segmentation strategies that follow best-practice network design.
- Manage firewall policies, VPN tunnels, and access control lists to ensure secure access, protect internal resources, and support remote connectivity.

Responsibilities

- Managed and resolved IT service requests and incidents using ServiceNow, ensuring timely issue resolution and system availability.
- Administered Linux servers and operating systems across production and development environments. performing system configuration, maintenance, patching, and performance optimization. Managed user accounts, permissions, system updates, and security policies
- Automated routine administrative tasks using Bash shell scripting, improving operational efficiency and reducing manual effort.
- Monitored system performance, analyzed logs, and troubleshoot infrastructure issues to ensure high availability and reliability.
- Automated administrative tasks using shell scripting. Monitored system performance and implemented backup and disaster recovery procedures
- Provided technical support across end-user computing, infrastructure services, cloud platforms, ERP systems, business applications, and B2B integrations.
- Administered network services including IP addressing, DHCP, DNS, and connectivity troubleshooting.
- Administered cloud-based backup solutions and SaaS applications, managing permissions, access controls, and compliance requirements.
- Ensured data synchronization, governance, and policy compliance across on-premises and cloud environments.
- Collaborated with cross-functional teams on infrastructure upgrades, cloud migrations, system enhancements, and process improvement initiatives

IT Support Engineer | Metrofile Pty Ltd - South Africa

2010 – 2015

Responsibilities

- Respond to service requests (tickets) from internal teams or clients. Use Jira ticketing systems to track issues.
- Manage and maintain Windows Server and Active Directory environments.
- Supported and maintained Microsoft OneDrive, SharePoint Online, and Microsoft Teams environments, ensuring secure collaboration and user access.
- Create and manage user accounts, groups, and permissions. Providing support to remote users, addressing issues and queries effectively.
- Handle file shares, printers, servers, and group policies (GPOs). Apply system and security updates regularly.
- Configure and support switches, routers, firewalls, and Wi-Fi access points. Monitor disk space, CPU, and RAM usage on servers
- Manage IP addressing, DHCP, and DNS services. Troubleshoot slow connections, outages, or access issues. Ensure secure VPN access for remote users.
- Enforce password policies, multi-factor authentication (MFA), and access controls. Apply patches and security updates on servers and user systems.
- Coordinate with management on data protection and regulatory compliance (GDPR, ISO, etc.).
- Manage cloud-based backups, SaaS application access, and data synchronization between on-premises and cloud systems.
- Ensure policy compliance and consistently meet Service Level Agreements (SLAs).

EDUCATION

Griffith College – Dublin

Master of Science in Computing (MSc)

College of Computing Technology (CCT) - Dublin

Bachelor of Science (Honours) in Information & Technology

College of Computing Technology (CCT) – Dublin

Bachelor of Science in Information & Technology

I.T Academy & Skillsoft | Cape town - South Africa

- I.T Professional Certificate

Key Concepts Covered: A+, N+, Server+, Security+, CCNA, CCNP, CISSP, MCSE, MCITP Enterprise Admin, MCITP Server Admin, MCTS, MCSA, SQL, Linux+, Net+

Harold Cressy High School | Cape town - South Africa

- National Senior Certificate (NSC) / Leaving Certificate
